The Nelson Institute for Environmental Studies is holding a forum on the impacts of climate change in Madison on Tuesday, November 14, 2018 at 6:30 p.m. in Room 260 of the Madison Municipal Building. **A possible quorum of the Council may exist on this forum.**

The New Normal: What does climate change mean for Madison?

Join the Nelson Institute, community leaders and climate experts for a forum on climate change, where attendees will explore the impact climate change is having on the Madison area and what is being done to mitigate the causes. From the shorter periods of ice cover on the lakes to the flooding that has taken place in recent years, participants will discuss the challenges climate change has presented as well as what adaptations are needed to increase resiliency in these changing times. Participants will also learn more about renewable energy initiatives, vulnerability assessments and other ways that the city and county are preparing Madison and its residents for the future.

Panel Speakers:

- Dan Vimont, Director, Center for Climatic Research (speaker & moderator)
- Jon Meiman, Chief Medical Officer/State Environmental and Occupational Disease Epidemiologist (DHS)
- Keith Reopelle, Director for Dane County's Office of Energy and Climate Change
- Jeanne Hoffman, Facilities and Sustainability Manager, City of Madison
